
a
Four routes to activity–toxicity information
TIGER
Explicit strain–peptide–host links
19,888 links / 3,023 entities
DRAMP 5.0
Activity and toxicity annotations
3,855 co-annotated bulk-export entries
DBAASP v4
Condition-resolved assay records
13,348 entries in the joint filter
dbAMP 3.0
Functional annotations and tools
6,878 co-tagged entries
b
TIGER evidence selection
Co-recorded entities
19,956
Published linked entities
3,023
MIC + 50% endpoints, shared native unit
2,589
Both sides have exact values
1,775
